PEDRO VEGA

TECHNICAL WRITER | UX WRITER | CONTENT DESIGNER

SUMMARY

Technical and UX Writer with experience spanning physical hardware and developer software, specializing in zero-to-one manuals, REST APIs, SDK guides, and user-centered content design. Test implementations firsthand in local environments to verify real-world accuracy across all documentation formats. Embed within agile teams to shape intuitive, WCAG-compliant UI text, standardize templates through Docs-as-Code practices, and lead localization efforts for global markets.

EXPERIENCE

Freelance Technical Writer

Remote | April 2024 - Present

- Owned the full documentation lifecycle for developer-facing projects, authoring API references and SDK guides for cloud data routing architectures that integrate with Datadog log pipelines and Galileo LLM tracing.
- Documented TypeScript SDK methods and logic for the Sui blockchain platform, producing quickstarts and walkthrough guides with working code examples.
- Authored developer cookbooks and tutorials, including a step-by-step guide on setting up Postman mock servers to confirm REST API endpoints.
- Managed OpenAPI specifications to document REST API endpoints to draft end-to-end API documentation architecture.
- Integrated generative AI tools and Model Context Protocol (MCP) servers into a local CLI. Connected Vale, DeepL, and Figma to a Gemini CLI to automate linting, translation, and development workflows.
- Engineered an advanced search architecture for custom HTML and Docusaurus sites, integrating Algolia and AskAI to add generative AI and semantic search across complex documentation.

AV & IT Specialist (Contract), SmartIT

New York, NY | March 2026

- Executed physical AV and IT infrastructure setup for an enterprise office migration in NYC, assembling and mounting commercial displays, TVs, and workstation hardware across conference rooms and open areas.
- Routed, connected, and managed power, video, and network cabling across executive meeting spaces to ensure clean, functional hardware setups.
- Tested and verified display inputs, video feeds, and desktop connections post-installation to confirm every unit ran cleanly for end users.

UX Writer, Culangex

Remote | December 2024 - January 2026

- Collaborated with cross-functional teams to co-author the product style guide that kept brand voice consistent and met WCAG accessibility standards.
- Partnered with the agile development team to manage UI text, error messages, and tooltips, keeping product copy consistent from design review to release.
- Translated user-facing content for the Spanish localization team, positioning the product for launch in Spanish-speaking markets.

Technical Writer, Felix Storch Inc.

The Bronx, NY | March 2022 - February 2024

- Managed documentation for 5 consumer and medical hardware brands, authoring 150+ manuals and installation guides with Spanish and French sections for Latin America and Canada.
- Interviewed engineers and product owners for every revision, converting firmware, hardware specs, and regulatory constraints into user-facing instructions.
- Standardized document control templates and publishing workflows, reducing manual production times by 40%.
- Triaged documentation requests from support, regulatory, and product teams, enforcing one documentation standard without a writing team.

New York, NY

EDUCATION

The City College of New York
B.A., English, minor in Journalism

The City College of New York
Publishing Certificate Program, focus on Editing

SKILLS

TECHNICAL & API DOCUMENTATION

Core Documentation
Docs-as-Code · REST & OpenAPI · MCP Integration · IA · SOPs · Quickstarts · CI/CD

Developer Tools
Git (GitHub, GitLab) · Linux/CLI · Docker · VS Code · Postman · Swagger · Docusaurus · Algolia · Jira · Notion

UX WRITING & CONTENT DESIGN

Design Practice
UX Writing · Microcopy · Prompt Design · Content Systems · UX Research · Wireframes · WCAG Accessibility

Design Tools
Figma · Snagit · MS Word

HARDWARE & SYSTEMS

Systems & QA
Medical & Consumer Hardware · Hardware Testing · Commercial Displays & AV · Signal Routing · Network Cabling · SOPs · Equipment Logs

TECHNICAL STACK & AI

Stack & Languages
HTML · CSS · JavaScript · TypeScript · Markdown · React · Node.js · Bootstrap

AI Models & Prompting
Gemini · Claude · GPT (Prompt Design for UI Microcopy, Error States & Technical Docs)

AI Systems & Tooling
Model Context Protocol (MCP) for Localization & Tooling · DeepL & Lara (TMX) · Semantic Search · Galileo · Vale

ADDITIONAL & LANGUAGES

Publishing & Translation
SEO Optimization · Technical Translation · AP Style · Adobe Suite (InDesign, Illustrator, Acrobat) · MadCap Flare

Languages
Spanish (Fluent) · French (Intermediate)

English Tutor, Self-Employed

New York, NY | November 2014 - March 2022

- Guided students in writing mechanics and reading comprehension, using targeted mini-lessons to clarify challenging concepts and address individual learning needs.
- Systematically monitored student performance and provided constructive feedback, establishing contributor training methods to ensure documentation quality.

Journalist, The Borgen Project

Remote | June 2020 - January 2021

- Researched and published 15+ high-impact SEO-optimized articles on international poverty and humanitarian policies.
- Conducted in-depth interviews with experts to strengthen the credibility and depth of articles.
- Optimized content for SEO and lifted article visibility and engagement by 30%.

Trade Editorial Intern, W.W. Norton & Company

New York, NY | January 2019 - April 2019

- Drafted and edited marketing materials for 10+ published works.
- Coordinated with authors and vendors to ensure the timely delivery of promotional materials.
- Assisted senior editors in line-editing manuscripts, reducing review cycles by 25%.

Media Services Technician, New York City College Of Technology

Brooklyn, NY | February 2015 - January 2016

- Authored internal technical documentation, Standard Operating Procedures (SOPs), and troubleshooting guides for AV technicians, reducing support resolution times by 20%.

PROJECTS

Sweepy, Job Search Automation Tool and Documentation

GitHub: github.com/pvega62/sweepy | Docs: pvega62.github.io/software/docs/sweepy/intro

- Built an MIT-licensed Python tool that sweeps nine job boards, including Greenhouse, Ashby, Lever, Workable, and Built In NYC. It drops dead links and merges duplicates across boards, then scores each posting against the user's resume.
- Split the sweep into five stages behind an MCP server, so an AI assistant can build a profile and run a sweep. The assistant scores each card, then exports a PDF, CSV, and JSON report.
- Wrote Sweepy's 13 documentation pages for the Docusaurus portfolio site, covering the pipeline walkthrough, CLI, configuration, and MCP references. Every page appears in Spanish, French, Arabic, Japanese, Hindi, and Chinese.
- Directed GitHub Copilot and Gemini with repository-level agent guidelines. An automated test suite and CI then verified the generated code.
